

PRODUCT SPECIFICATIONS

The LIFTED PRO E-005 Professional standard in-ear monitoring headphones

FEATURING

- Patented dynamic Beryllium 10mm drivers with extended frequency range to 40 kHz for crisp high-resolution sound with warm bass.
- Non-distorted sound quality even at higher volume.
- Ergonomic fit with flat profile for high level of wearing comfort for extended periods of music enjoyment.
- Interchangeable cables through the MMCX connection, with and upgrade to Bluetooth is available as an optional extra.
- Die-Cast Metal housing in high quality chrome finish.

The LIFTED PRO E-005 is a joint collaboration project with Brand Nation Media for the development of a professional standard in-ear monitoring headphone to suit every pocket without compromising high-end quality. The patented and tuned Beryllium dual dynamic drivers have been specially designed to deliver great sound for every music genre.

The extended frequency range to 40 kHz makes this product Hi-res ready and is housed in an ergonomically designed chrome finish metal casing to provide comfort whilst enjoying the music.
